• Streetscapes & Commercial Landscapes

Bloom: Cream-yellow spike inflorescence that sit slightly above foliage in spring.

Notables: • **LIKES** - Well drained soils; Filtered sun to heavy shade
• **DISLIKES** - Over watering and temps below 15 degrees F
• Drought tolerant, frost tolerant, salt tolerant, deer resistant

TUFFY

High Impact
Low Maintenance

A fine blade, compact Lomandra with blue-green foliage, Nyalla is a selection from the same breeding program as our popular L. longifolia BreezeTM. Like Breeze, Nyalla has the look and feel of an ornamental grass, but is far tougher: extremely drought tolerant and evergreen even when temps occasionally dip into the teens. A great choice for home landscapes, streetscapes, commercial projects and anywhere a low maintenance grass is needed.
