

TUFFY

High Impact
Low Maintenance

*see variety key at right

Anigozanthos hybrids (breeder's rights asserted) - From a long-time breeder of kangaroo paw, these were bred using the big and tough *Anigozanthos flavidus*, crossed with more dwarf and attractive species to yield intermediate-sized selections that have improved vigor, disease tolerance, frost tolerance and a great display of "kangaroo paw" flowers. Great for Western landscapes and also a strong performer in other markets as a potted plant.

CROP TIME:

- 1-gal: 3 mos. from liners
 - 3-gal: 4-6 mos. from liners
 - 5-gal: 6-8 months
- *depending on inputs & climate

SALES STRATEGY:

Flowers all season long making it ideal for retail sales and commercial landscapes alike

LANDSCAPE NICHE:

Anigozanthos preform best In Zones 9-11; arid to semi-arid climates. In other climates, use as an annual in the garden.

CONTAINER APP:

Great for large patio planters where height and color is needed.

Landscape-Hardy Kangaroo Paw

Leaf:

- Broad, sword-like foliage arranged in fans that create a 3 dimensional tufted plant.
- Color is deep green; texture is smooth

Habit:

- Varies but generally considered "medium-sized"
- Fans of foliage twist and curl as they mature
- Zones 9-11 & arid to semi-arid for landscape applications

Apps:

- Widely used in Western gardens and other commercial & municipal landscapes in arid climates; short-lived perennials in humid areas
- Great for large containers in any region

Bloom:

- Vivid (and very unique) flowers sit above the foliage on the branched inflorescence. The current varieties are a deep red, orange, yellow and red/green; all are very floriferous.
