

TUFFY

Plant Collection™

Lomandra longifolia 'LM400' PP15,583 - A fine blade, compact Lomandra with blue-green foliage, Nyalla is a selection from the same breeding program as our popular L. longifolia Breeze™. Like Breeze, Nyalla has the look and feel of an ornamental grass, but is far tougher: extremely drought tolerant and evergreen even when temps occasionally dip into the teens. Use anywhere low maintenance grasses are needed.

Lomandra Nyalla™

Foliage: • Fine-textured, grassy foliage; deep blue-green foliage in both full sun and moderate to heavy shade.

Habit: • 4 ft H x 4 ft W (+/-); tufting with an arched to weeping habit. Weeping habit in shade.
• Slow to mature; almost indeterminate growth
• Zones 7b -11; Evergreen in Zone 8

Apps: • Mass, Group or Specimen Plantings
• Water-wise Home Gardens & Containers
• Streetscapes & Commercial Landscapes

Bloom: • Yellow-orange spike inflorescences that sit slightly above foliage in spring.

Notables: • LIKES - Infrequent irrigation, filtered sunlight
• DISLIKES - Overmulching, overwatering

Sales Niche: • Drought tolerant, evergreen "grass" for mild climates

CROP TIME:

1-gal: 4-6 months from liners
3-gal: 7-9 months from liners

*depending on inputs & climate

SALES STRATEGY:

In Zones 8-11, sell as a drought-tolerant, evergreen "grass" in sizes from 1-7 gallon.

LANDSCAPE NICHE:

In Zones 8 and warmer, use as an evergreen "grass" for border, mass plantings, groupings, etc; home & commercial applications

CONTAINER APP:

Yes! Great for adding year-round grass texture to large waterwise planters.
